FAX: (03)3587-1359

Att: Mr. Isaac Oved  
NRG International 2000  
Import-Export

July 18, 1991

Re: Test for NRG Efficiency

Dear Sir,

I would like to report to you the results of the captioned test carried out based upon your request as follows:

1. Precondition:

- (a) As you may understand, we carry out the patrol of the express highways, removing outordered cars including damaged cars due to traffic accidents and others in accordance with the contract with Metropolitan Express-Highway Public Corporation. It is to be noted that this test was carried out through using the cars we use for carrying out the above-mentioned works entrusted by the Public Corporation.
- (b) In the case of removing outordered cars and damaged cars due to traffic accidents, we used to park our cars at the concerned area without stopping the engines of the cars. In such case we amended the consumption of fuel oil in consideration of our past experiences by one litre per 20 minutes (2000rpm)

CONSULATE-GENERAL FOR SAINT LUCIA

TOKYO HONORARY CONSULATE-GENERAL:

FUGAKU Bldg.-5TH  
AKASAKA 6-15-12.  
MINATO-KU, TOKYO,  
JAPAN  
TEL: (03)3587-1011  
FAX: (03)3587-1359

- (c) This test was carried out through using gasoline cars. So it is to be noted that diesel cars were not used. The test for diesel cars is now progressing, and will be finished before the end of August. So you will be reported before the end of September.
- (d) In the test we exchanged oil filters, but did not airfilters.

2 Results of Test

- (a) The test proved that consumption of fuel oil was reduced by about 9 percent.
- (b) The detailed results of this test are as shown in the attached table.

Sincerely yours,

Takashi Miura  
President  
Highway Service Limited
